ChainNinja
## Blockchain Solutions

MAKING BLOCKCHAIN
REAL FOR BUSINESS

Strategy Assessment, Solution Design, and Solution Build & Implementation

Why ChainNinja?

- Blockchain Framework Agnostic
- Custom End to End Solutions
- We are open for specialized block-chains
- We provide Enterprise blockchain concepts
- Purpose-built infrastructure compo-nents for a specialized use case
- Collaborative, Agile, and Efficient in every step of providing our client a field-tested Proof of Concept

Choose a Blockchain framework based on your business considerations

- Open platform and open governance
- Economic viability of the solution
- Longevity of the solution
- Coexistence with adjacent systems
- Regulatory compliance

What's happening in your industry?

- Estonia has virtually eliminated the need to have a Health Information Exchange (HIE), all-payer claims data-base, or Electronic Medical Records (EMRs). This has made the entire population much more health smart and built a huge foundation of trust for accessing patient records

ChainNinja Turns Disruptive Technology into Innovative Solutions

Clinical Trial Management – Blockchain allows for reaching a substantial level of historicity and inviolability of data for the whole document flow in a clinical trial. Hence, it ensures trace-ability, prevents a posteriori reconstruction and allows for securely automating the clinical trial through what are called Smart Contracts. At the same time, the technology ensures fine-grained control of the data, its security and its shareable parameters, for a single patient or group of patients or clinical trial stakeholders.

Health Data Exchange – Blockchain technology allows data to be managed directly by the owner of the data instead of a broker. Patients, care providers and health systems can directly control who sees their data, for how long, and under what conditions. Data access can be granted and revoked by the data owner instantaneously and at any time. The platform manages ownership of and access to every piece of data sepa-rately, from blood work to genetic profiles to medication orders, in an instantaneous, autonomous and secure way

ChainNinja Offers Holistic Blockchain Solutions in Healthcare and Life Sciences

- ✔ Clinical Trial Management
- ✔ "Health Data Exchange"
- ✔ "Reference Data"
- ✔ "KYC"
- ✔ "Fraud & Compliance"
